Singer overlock model S0105

£285.00 4.8★

If you want the closest budget-friendly rival, the Brother M343D Overlocker is the standout alternative. At £199.00, it's noticeably cheaper than the Singer S0105 while still earning a strong 4.7★ rating. It's a smart choice if you want reliable overlocking for finishing seams, working with knits, and getting that neat professional edge without stretching your budget. What's better: the lower price and excellent value. What's worse: it may not feel quite as premium as the Singer, so if you want the most refined build and finish, the S0105 still has the edge.

The Brother 2104D Overlocker sits closer to the Singer in price at £265.00 and also scores 4.7★. This makes it a very fair comparison if you're choosing between brand reputation, ease of use, and everyday sewing performance. What's better: it's a strong all-rounder and slightly cheaper than the Singer, so you may get similar satisfaction for a little less money. What's worse: it doesn't undercut the Singer by much, so the value difference is smaller. Choose this if you want a dependable overlocker from Brother and are happy to pay near-premium pricing for a trusted machine.

If you're not set on an overlocker and mainly want a machine for general garment sewing, the Janome 2212 Sewing Machine Includes Exclusive Bonus Bundle is worth considering at £221.68. It's far less specialised than the Singer S0105, so it won't replace proper overlocking, but it can be a better buy for beginners or mixed sewing projects. What's better: versatility, and the bonus bundle adds extra value. What's worse: it won't trim, stitch, and finish seams in the same way an overlocker does. Pick this if you're building a sewing setup from scratch and need a solid everyday machine rather than a dedicated edge-finishing tool.

The Brother M343D White Stainless Steel Serger is another version of the M343D family, priced at £249.00. Compared with the Singer S0105, it offers a similar overlocking purpose at a slightly lower price, with a strong 4.5★ rating. What's better: it may appeal if you prefer Brother styling or are looking for a specific finish and compact footprint. What's worse: the rating is a little lower than the standard M343D, and it still doesn't beat the Singer on overall customer approval. This is a sensible choice if you like the M343D platform but want a different variant.

Finally, the Brother 3034DWT with Wide Table Overlocker is the premium option here at £335.00. It's more expensive than the Singer S0105, but that extra spend can be worth it if you sew larger projects or want more workspace. What's better: the wide table is a real advantage for handling bigger fabric pieces, dressmaking, and bulkier jobs. What's worse: the price is higher, so it's not the best pick if you're simply trying to save money. Choose this if you sew frequently, work on larger garments, or want a more comfortable setup for longer sessions.

Still Buy the Original If...

The Singer S0105 is still a great choice if you want a highly rated overlocker with a proven reputation and you're happy with the price. It's especially sensible if you prefer Singer's feel, features, and support over saving a small amount elsewhere.
